

A & P – Final Music Video

- Create an original song or adapt an existing song (no copying someone else's work)
- You can work alone or in groups of up to 4 people
- Everyone in your group must be visible (and productive) in at least part of the video
- Choose general A & P info., a body system, or a specific organ/structure to review
- Clearly identify your topic before your performance begins
- Include accurate facts about your chosen topic (inform 1st, entertain 2nd)
- Include some visuals to help explain, reinforce, or supplement your information
- Be creative and entertaining; musical ability is semi-optional (but don't make me wince/cringe)
- The class must be able to understand your words, so monitor volume & enunciation carefully
- Include the lyrics on the screen/within the video
- Have a steady hand film your performance (don't make me sea sick)
- Performances should be approximately 2 minutes long
- Demonstrate wisdom and emotional maturity (don't be inappropriate/attempts to shock, etc.)
- Have fun!
- Each group needs to submit 1 copy of this information sheet (with names & topic) on performance day for me to use as a scoring sheet
- Each group also needs to submit a copy of the lyrics to their song
