

# A & P Final Dissection – Fetal Pig

Using the dissection guide, you will be asked to dissect a fetal pig and label certain structures using dissection pins and tape. Be careful with placements and make sure your pins are secure. If I am unsure what you are identifying, cannot read your labels, and/or your pins/labels fall off you will not be given credit.

## External Anatomy

1. Ventral surface
2. Dorsal surface
3. Lateral surface
4. Midsagittal plane

## Muscular System

5. Latissimus dorsi
6. Deltoid
7. Biceps femoris
8. External oblique
9. Triceps
10. Trapezius
11. Sartorius

## Digestive System

12. Liver
13. Stomach
14. Spleen
15. Small intestine
16. Large intestine
17. Esophagus
18. Duodenum
19. Caecum
20. Gallbladder
21. Rectum
22. Uvula
23. Pancreas

## Urinary System

24. Kidney
25. Urinary bladder

## Respiratory System

26. Diaphragm
27. Lungs
28. Umbilical cord
29. Pharynx
30. Larynx
31. Trachea
32. Bronchus

## Circulatory System

33. Heart
34. Pulmonary artery
35. Inferior vena cava
36. Left ventricle
37. Right atrium

## Nervous System

38. Cerebrum
39. Cerebellum
40. Medulla Oblongata
